## Charity work BritishRedCross

Tiltiy Operation Anti-Loneliness with BritishRedCross; 20hour stream on Twitch with the goal to raise money and awareness for loneliness and mental-health. Our campaign was called 'Operation Mental-Health' with a group of five members and interactive viewers raised £201 with an initial goal of £100. Due to this achievement, we decided to stream an extra four hours

## Python Projects

### BeautifulSoup & Spotify

This project showed how the Python library BeautifulSoup works, by webscraping the top 100 songs from billboards song website on a specific user-input date given then using spotify's api to compile all the scrapped songs onto the users spotify playlist.

### Selenium & Instagram

This project shows the use of Selenium WebDriver and how it can be used to carry out repetitive tasks on the web. In this case finding a user on Instagram and following all their followers.

### Tkinter Password Manager

This project helps store emails and passwords on a json file in my computer without out having to rely on autofill for website accounts. With the use of TKinter GUI toolkit so that you never forget a password again.

## Profile

A highly motivated and detail-oriented aspiring Python developer with experience in online coursework and several personal projects. Seeking to expand skills and knowledge through a coding bootcamp while developing industry-standard projects and gaining practical experience. Strong problem-solving and analytical skills, with a passion for coding and technology.

2022-2023

100 Days of Code: The complete Python Pro Bootcamp for 2023. 70% Complete

Created by Dr. Angela Yu.

Experience with popular Python libraries and frameworks such as Pandas, Tkinter,

BeautifulSoup, Selenium WebDriver, Requests APIs, and Flask.

While using the popular IDE PyCharm.

## Work Experience

Natalia Almazova Fashion Studio LTD

2020-2022

- Website Development: increased client's web-traffic by 33% by optimising the website via WiX (a cloud-based web development service). This was done through SEOs (search engine optimisation) and a UX (user experience) overhaul.
- Communication: responsible for client-facing communication, responding to emails and requests.
- Project Management: setting up meetings with clients and scheduling jobs, prioritisation, coordinating multiple tasks at the same time.
