Python Projects

Website & links to projects:
https://bunnyx0.github.io/Frankie Website/

BeautifulSoup & Spotify
- Takes in users input to narrow down data scrapping.
- Using BeautifulSoup scrapes Billboards top 100 songs of given year.
- Compiles data of songs found into a playlist using Spotify's API.

Selenium & Instagram
- Shows how the use of Selenium WebDriver can be used to carry out repetitive tasks.
- This project finds a user on Instagram and automates following all their followers.

Tkinter Password Manager
- Uses Tkinter GUI toolkit to store emails and passwords onto a json file.
- Able to filter through and retrieve passwords from stored json file using linked websites.
- Generate randomized passwords with mix of letters, numbers and symbols.

Profile

A highly motivated and detail-oriented aspiring Python developer with experience in online course and several personal projects. Seeking to expand skills and knowledge through a coding bootcamp while developing industry-standard projects and gaining practical experience. Strong problem-solving and analytical skills, with a passion for coding and technology.

Work Experience

Natalia Almazova Fashion Studio LTD 2020-2022   Marketing Assistant

- Website Development: increased client's web-traffic by 33% by optimising the website via WiX (a cloud-based web development service). This was done through SEOs (search engine optimisation) and a UX (user experience) overhaul.
- Communication: responsible for client-facing communication, responding to emails and requests.
- Project Management: setting up meetings with clients and scheduling jobs, prioritisation, coordinating multiple tasks at the same time.
- Social Media: Raised Brand Awareness through launching the client's Instagram page and developed a weekly content plan which gained 5,000 views per post. The client's followers increased from 2,000 to 6000 over a three month period and are currently at 10k+ followers

Marks and Spencer 2021-2022 Customer Assistant (Christmas Job)

- Sales: Managed sales of stocks to make sure products were on shelves at the correct price and place as well as recording any missing inventory that needs to be ordered or sold out off.
- Retail Marketing: Working with store floor designers and management for optimal product layout and presentation to provide the best customer experience at the store.
- Communication: Building good communication with the morning team and updating them with any unfinished tasks or excess delivery of products in storage.
- Flexible & agile: Relocating focus to other sectors of the store during busy seasons to help relieve pressure of other workers that were overwhelmed.
